

Amplitude Surgical announces that its subsidiary Novastep has signed an exclusive distribution agreement

- Exclusive distribution contract with Carbon22, an American company specialized in developing innovative foot and ankle implant solutions
- Marketing of Carbon22 implants on the American market

Valence, February 26, 2020, 6:00 pm CET - Amplitude Surgical (ISIN: FR0012789667, Ticker: AMPLI, eligible for PEA-PME plans) ("**Amplitude**" or the "**Group**"), French leader on the global surgical technology market for lower-limb orthopedics, announces that its subsidiary Novastep has signed an exclusive distribution agreement with Carbon22 on the global market, and in particular the US market.

Founded by a consortium of distinguished orthopedic and podiatric surgeons, Carbon22 is an American company specialized in developing innovative foot and ankle implant solutions. It also provides advanced practical and surgical techniques for foot and ankle repair.

Carbon22's implants offer unique characteristics such as Radio transparency (titanium PEEK / carbon-PEEK hybrid technology), which allows intraoperative visualization of fusion sites and post-operative visualization of healing zones. These innovative characteristics give Carbon22's solutions a disruptive positioning compared with competitive products whilst limiting their costs.

The exclusive distribution agreement signed with Carbon22 will allow Novastep, Amplitude subsidiary and recognized player in the field of medical devices for lower-limb surgery, to incorporate an innovative range of solutions within its product offering and thus accelerate its growth opportunities in the United States.

Olivier Jallabert, Chairman and CEO of Amplitude Surgical, states: *"We are delighted that our subsidiary Novastep is partnering with these prestigious foot and ankle surgeons with whom they will collectively develop new solutions for improving patient treatment and outcomes. The exclusive large-scale marketing of Carbon22 implants on the American market will enable Novastep to seize major growth opportunities."*
